

PREFACE

This Directory was compiled to assist, as appropriate, in a) the local preliminary coordination of contemplated frequency usage, b) the local selection and scheduling of the use of assigned frequencies, and c) the local resolution of cases of harmful interference.

Changes to this Directory should be provided to the departments/agencies listed in Section 1.

CONTENTS

This Directory contains four sections:

- Section I** contains the headquarters address and telephone number for frequency management personnel of the major Federal Government agencies. It is intended that these offices be contacted only in the event there is no field contact listed that might handle the specific problems or contact cannot be made with the appropriate field personnel listed in Sections II and III.
- Section II** contains a listing for each State, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands, arranged alphabetically. Listed under each of these is the name of each department or agency of the Federal Government that has field contacts who are concerned with some use of radio frequencies in that jurisdiction. Listed to the right of each department or agency are numbers that refer to the field contacts of that department or agency for that jurisdiction. The decodes for the numbers are given in Section III of this directory where they are arranged numerically under the department or agency concerned.
- Section III** lists the field contacts of the department and agencies of the Federal Government. The departments and agencies are arranged alphabetically. Under each is shown the title, mailing address, and phone number of the field contact for that department or agency. Also shown are the geographical areas under the cognizance of each contact and, in some cases, the frequency bands or types of operations involved.
- The number shown in the top left corner for each contact is also entered in Section II of this directory under each State or other jurisdiction over which the field contact has cognizance.
- Section IV** lists the field contacts or non-Federal Frequency Advisory Committees. The information is arranged by service. This is a list of contacts for those services where nationwide coordination is accomplished through a centralized coordination office.

SECTION I

Headquarters

This section contains the headquarters address and telephone number for frequency management personnel of the major Federal Government agencies. It is intended that these offices be contacted only in the event there is no field contact listed that might handle the specific problems or contact cannot be made with the appropriate field personnel listed in Sections II and III.

SECTION II

State Guide

This section contains a page of each State, the District of Columbia, Guam, Puerto Rico and the Virgin Islands, arranged alphabetically. Listed under each of these is the name of each department or agency of the Federal Government that has field contacts who are concerned with some use of radio frequencies in that jurisdiction. Listed to the right of each department or agency are numbers that refer to the field contacts of that department or agency for that jurisdiction. The decodes for the numbers are given in Section III of this directory where they are arranged numerically under the department or agency concerned.

SECTION III

Government Field Contacts

This section lists the field contacts of the departments and agencies of the Federal Government. The departments and agencies are arranged alphabetically. Under each is shown the title, address, and phone number of the field contact for that department or agency. Also shown are the geographical areas under the cognizance of each contact and, in some cases, the frequency bands or types of operation involved.

The number shown in the top left corner for each contact is also entered in Section II of this directory under each State or other jurisdiction over which the field contact has cognizance.

SECTION IV

Non-Government Field Contacts

This section lists the field contacts on non-Federal Frequency Advisory Committees. The information is arranged by service. On April 15, 1986, the Federal Communications Commission (the Commission) released a Report and Order which adopted rules and procedures for most radio services or specialized group of frequencies listed in Part 90 of the Commission's Rules. Information regarding frequency coordination procedures and services can be obtained from the certified coordinators listed in this section.
